

EXPERIENCE

BUILDING IT RIGHT

Helping find the material sources - the next generation of raw materials - and creating solid partnerships based on sustainable goals

2cg is well entrenched in the waste management industry and this inside perspective provides a clear view to potential material sources.

2cg has the experience in making the right introductions, to making good matches in partnerships and to understanding the protocol in each scenario.

2cg has the numbers and the knowledge to identify source potential for construction & demolition. material and the possible markets - from residential to industry, commercial and institutional.

2cg is systematic in its approach to strategy development and leaves no opportunity uninvestigated or evaluated to match client parameters and needs.
